- **US Election Night Video Presentation (1 KP) 1 Slot left!**
- For this assignment, you (either individually or in a group of two) will have the opportunity to create a video presentation for the US Election Night event that will take place in the Atlantis in Basel. Your task is to put together a 10-15 minute video that will be shown during the US election event on **Tuesday, November 5th**. The video should either recap the US election by offering an overview of the race and its key moments and/or feature an interview with a US politician or political scientist. Be as creative as you'd like with the format – it can be a collage of clips, a documentary-style recap, or a series of interview excerpts or an interview done by yourself! This is your chance to engage your audience and showcase your perspective on the US election.
- The total time slot we have left is 10 minutes, so we have space for a maximum of 1 video, and you'll receive **1 KP** (Credit Point) upon completion of a learning contract. In addition, you will be given **a ticket to attend the event** (which includes food). The final video should be submitted by **October 28th**. Think about how you want to present the content clearly and creatively, while staying within the 10-15 minute time frame. Your video presentation will be a key feature of the Election Night event, so you have the chance to make it informative and engaging!
